Telekinesis, the non-physical movement of objects, is at first glance somewhat more unusual than telepathy. However, it is definitely a part of everyday life, even if it is not immediately recognized as such everywhere it occurs. When someone in karate smashes a brick with his hand or someone in distress can suddenly lift a car - what is that? There are also people who fill a room as soon as they enter - how do these people do it so that you can almost physically feel it? Fortunately, there is a simple experiment with which one can directly prove telekinesis in the sense of "moving without touching", as well as a multitude of playful experiments with which one can then further explore and practice telekinesis.

Finally, a simple model can be derived from the observations that describes the phenomena and makes practicing telekinesis much easier.

Today the discovery of the so-called God particle, the Higgs boson particle is forcing us to rethink our idea of God and how he thinks. Applying the theory of the God particle as the basic building block of everything that exists, we can easily ascribe the creation of all existing forms as simply Gods way of thinking or intelligent design. Our story is the ability to change forms, rearrange the God particles by human beings, which comes about as a side effect from an illegal stem cell drug given to paralyze people. The patients are able to do out of the body travel, upsetting our legal systems. The story leads us to crimes committed by the out-of-body travelers, the law enforcement, efforts frustrated by the lack of physical explanations. An analysis by law enforcement of these weird crimes now delves into shape shifting and vampire studies, which seems related to the out-of-the-body travel. The story presents the new power, which must be stopped as a danger to our whole political system. Morally, illegality of stem cell cures, conscience of might makes right, shift shifting, vampires, and the so-called Rapture or second coming are all woven together to bring the reader into a debate about religion, science, morality, and God.

communicative channels. Each accuses the other of media jamming and propaganda, and each proclaims its own communication practices better for expression and creativity. Technologies for Intuition theorizes phaticity—the processes by which people make, check, discern, or describe channels and contacts, judging them weak or strong, blocked or open. This historical ethnography of intuition juxtaposes telepathy experiments and theatrical empathy drills, passing through settings where media and performance professionals encounter neophytes, where locals open channels with foreigners, and where skeptics of contact debate naifs. Tacking across geopolitical borders, the book demonstrates how contact and channel shift in significance over time, through events and political relations, in social conflict, and in conversation. The author suggests that Cold War preoccupations and strategies have marked theoretical models of communication and mediation, even while infusing everyday, practical technologies for intuition.

Do you want to develop your telekinesis skills? Everyone who has practiced telekinesis will want to develop their ability to be able to move larger and heavier objects. It shouldn't be as hard as you think. Let's look at the hopes of others who still fail to do telekinesis even at their hundredth attempt. Where was their fault that they were still unable to move objects as light as a straw? In 2019, the author published a book on the same topic, telekinesis. The book described the procedures of telekinesis training seriously. The book has invited testimonials that were followed by appreciation and questions. The important questions that prompted the author to write this second book were: "why am I still unable to move the object?" and "how can I move heavier and larger objects?" This book is the answer to various questions about telekinesis. In the beginning, this book was intended for advanced learners and not for beginners. Nevertheless, even beginners should be able to learn telekinesis easily through this book. This book discusses how to focus appropriately in telekinesis, how to increase energy levels, how to use emotions for telekinesis, how to access appropriate and effective conditions of mind for telekinesis, and so on. In essence, anyone who fails with techniques obtained from other sources will succeed through the techniques taught by the author in his telekinesis books. Furthermore, this book doesn't just tell you what to do; this book also shows where your mistakes are (in telekinesis practice) and what you need to do to correct those mistakes. You are very capable of doing telekinesis and this book is your friend in practice. In the wake of Jean Piaget's work on children's understanding of reality, it is generally accepted that by age two, children assume that an object hidden in a box will remain there unchanged until someone tampers with it. Eugene Subbotsky persuasively demonstrates that many children--and some adults--will often accept mysterious disappearances and creations, perceiving them not as tricks or illusions but as actual occurrences. His analysis clearly shows that alongside our everyday belief in object permanence, we also have a set of quasi-magical beliefs that can be activated by appropriate situations and behaviors. The acceptability of these beliefs will vary from culture to culture, and will be widespread among preliterate peoples but less obvious

in advanced industrial countries. The author, a Russian psychologist, draws on his own extensive research and examines other taken-for-granted concepts, such as the distinction between animate and inanimate. Foundations of the Mind, amply illustrated with experimental material, has enormous implications for the study of both child development and the psychology of human beliefs. It attacks our complacent and often culturally biased faith in the nature of reality, and as such will become required reading for all psychologists.

Many have talked about the ascension process, but very few really understand what it means. Who is really out there? Where are we going? What are our choices? What has to be done to prepare for this event? Is everyone ascending to the same place? What happened to the fourth dimension? How can we understand the fifth dimension? What does it feel like? How does it operate? What are fifth-dimensional beings like? How do they live? This book explains all of these questions in a way that we can easily understand. It explains what our relationships are to known extraterrestrial groups and what they are doing to help Earth and her people in this crucial galactic moment in time. It explains how we can raise our vibration now, and begin the process of integrating higher-dimensional energies into our third-dimensional world.

“ Psi ” is the term used by researchers for a variety of demonstrable but elusive psychic phenomena. This collection of essays provides a detailed survey of the evidence for psi at the level of scientific examination. Key features of apparent psi phenomena are reviewed, including precognition and remote perception (knowledge of future or distant events that cannot be inferred from present information), presentiment (physiological responses to stimuli that have not yet occurred), the effects of human emotions on globally dispersed machines, the possible impact of local sidereal time on psi performance, and the familiar feeling of knowing who is calling on the phone. Special attention is given to those phenomena that make it difficult for scientists to get a clear understanding of psi. The body of psi research, while complex and frustrating, is shown to contain sufficiently compelling positive evidence to convince the rational open-minded observer that psi is real, and that one or more physical processes probably underlie observed psi phenomena.

What is needed is a new story and Alan Steinfeld's Making Contact is part of that story." —Deepak Chopra, Author, Total Meditation How can we prepare for an event that is literally beyond anything humanity has ever faced? Making Contact presents multiple perspectives on what no longer can be denied: UFOs and their occupants are visiting our world. The book answers questions which remain in the wake of the recent Pentagon's disclosures as to who and why these beings are here. The volume contains original writings by the leading experts of the phenomena such as: Linda Moulton Howe, Earthfiles reporter, Whitley Strieber best-selling author of Communion, Professor John E. Mack, former head of the Harvard Medical school of psychiatry and an alien abduction investigator, Darryl Anka internationally known for his communication with the extraterrestrial Bashar, Nick Pope, former UK Ministry of Defense UFO investigator, Grant Cameron expert on American presidents and UFOs, Drs. At this critical juncture in the government's official acknowledgement of the reality of UFOs/UAPs, scientists, politicians and mainstream news outlets have no idea what to make of these startling revelations or the outpouring of sightings and "contact" experiences currently being reported on a global scale. The book stands as the most comprehensive clarification to date on the intent and intelligence behind the phenomena. The variety of viewpoints expressed in the volume provide a solid foundation for the "preparation" of the greatest challenge to ever face humankind. Making Contact stands as the essential handbook for embracing the most exalted moment in history: Meeting the cosmic others.

This is a collection of the most important writings of Oxford philosopher H.H. Price on the topics of psychical research and survival of death, collected from a wide variety of sources unavailable to most interested readers. Included are discussions of telepathy, clairvoyance, telekinesis, precognition, hauntings and apparitions, the impact of psychical research on western philosophy and science, and what afterlife is probably like. Few twentieth century English-speaking philosophers have written much on these topics. Of those who did so and whose writings have not been collected and published in a single source, H.H. Price was the most important.

Canavin and the Master Defenders have become a renowned alliance for all humans and moral Pixalians to embrace. With the fall of a group of assassins just over two years ago, the team of heroes have since been focusing their attention on one hundred extremist bases that continue the corrupt code. As the heroes are determined to confront a dreaded mobster, an ancient legend is set to make history on the world. An enigmatic portal, believed to be the answer to the problems of all life-forms, becomes the focal point for Canavin's team among other alliances. And as this portal is an attraction for various humans and Pixalians, the sole way to locate it is with a map that only the greatest travelers can interpret. Canavin's team is strongminded to understand the map as it has intrigued the members of a reawakened faction of shadows. There are opposing goals for the portal as creatures of many races gather together to uncover its secrets, confident to use it for malicious purposes. Time is rapidly slipping away, and the Master Defenders must stay united as a 'shield' in order to challenge the other factions and obtain a hopeful future for all nations. Ever since science began seriously investigating the potentials of electronics, man has toyed with the idea of creating robots. The dawn of the robot age has already broken. We have automatic telephone exchanges. We fly planes with robot pilots. We send self-sufficient instruments into the void to record and transmit cosmic information. Frobisher was a brilliant theorist, years ahead of his time. He worked out a scheme that took long patient decades of planning. His great moment came. The robots were a success. Frobisher was a kindly old man. There was nothing evil in his plans. But the world is not entirely inhabited by kindly old men with high visions. Someone else got hold of the plans and the robots embarked on a career of international crime and pillage. Despite his pacifist ideals, the old professor tried to combat the evil which he had unwittingly released . . . the results were staggering.
